

Press release

SCHAKO to present innovations in the field of air-water systems at ISH 2023

Kolbingen/Frankfurt-Main, Germany – 1 March, 2023: The experts in ventilation and air conditioning for commercial and public buildings, will be presenting their latest products live at the SCHAKO booth from 13 to 17 March, 2023 at the ISH trade show in Frankfurt, Germany. Air-water systems from SCHAKO offer a wide range of potential applications for ensuring optimal solutions for all customers and every building.

The requirements for air conditioning and temperature regulation in buildings will continue to grow in the future, as increasing computer performance and outside temperatures heat up indoor spaces more and more. Energy-efficient systems from SCHAKO save valuable space whilst at the same time providing optimised performance, a low sound level, low air speeds and maximum comfort. These water-bearing products for installation in ceilings, walls and floors provide fresh air and thermal conditioning to ensure comfortable conditions in every single room.

Visitors can obtain information on the latest SCHAKO products at Stand C38 in Hall 8.0 at ISH 2023. The specialists for air-water systems will be presenting the AQSH (hybrid) and UKGW cassette products in detail here. The SCHAKO AQSH (hybrid) combines the positive properties of an induction air diffuser with those of a high-performance fan convector, thereby combining primary and secondary air conditioning in a single unit. Setting of the primary air volume directly at the unit and the high thermal performance with minimal noise characterise this product.

SCHAKO UKGW is a compact, cassette-format, water-based air circulation fan convector which meets the highest design and performance standards. Thanks to high-efficiency EC fans, high thermal performance in combination with compact dimensions and a low noise level, it provides maximum comfort in occupied areas.

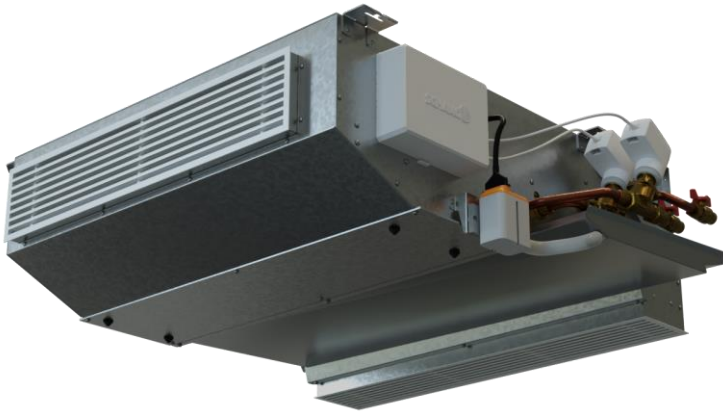

Visit us at ISH 2023 and experience the latest SCHAKO products live!

Printing/publication is free of charge. We would be happy to receive a copy of the document. This press release can also be found in digital form as text and image for download at: [schako.com -> Company -> Press releases].
