## Ceiling Impulse Diffuser Model PIL

### Description

The ceiling impulse diffuser type PIL-... has been specially designed for use **in clean rooms, operating theatres and comfort rooms up to heights of 4m**. It produces a **pulsating horizontal jet stream**. The supply air is discharged along the ceiling and, upon reaching the critical throw length, gradually sinks into the occupied zone at low velocity. The pulsating air pattern results in an **efficient reduction of the velocity and of the temperature difference in the air jet**. A displacement flow is created near the diffuser, which means the ceiling and diffuser itself are less prone to particles depositing on the outlet or near the ceiling. An integrated air guide funnel ensures that the supply air is discharged uniformly across the whole face of the diffuser. The diffuser can be used for cooling with a maximum temperature difference of -15K. A freely suspended installation is possible for sizes 500 and 600/625 up to a  $\Delta T$  of -4K. Size 400 needs a size 500 faceplate for freely suspended installation. The air guide funnel of PIL-G has been modified to allow a throughput of much **higher air volumes** (about +50%), compared with PIL, at the **same noise level** and at **lower pressure losses** (about -30%). This means a **saving** on ceiling impulse diffusers in case of a similar supply air volume. Reducing the number of diffusers automatically reduces the mounting and regulation costs.

The regular cleaning of the air diffuser required in clean rooms and operating theatres can be done easily and quickly due to the smooth surface of the front plate. The ceiling impulse diffuser can be used for supply and exhaust air. The ceiling impulse diffuser is connected to the duct system with a plenum box type SK-Q-... for the square model or type SK-R-... for round models. The supply air plenum box is fitted with an equalising grid, to ensure a certain admission pressure for optimal air distribution. A damper, adjustable from underneath, used for air volume control, can be installed (even when already installed) for both supply and return air versions at an extra charge. For plenum boxes type SK-R-..., the ceiling diffuser must be removed, before the damper can be adjusted. Alternatively, a cable-operated adjustment can be ordered at an extra charge, which allows the damper to be adjusted on the room side even with mounted diffuser.

The ceiling diffuser is fitted to the plenum box with a central screw for a masked assembly (concealed mounting). The funnel shaped VM holder on the traverse makes assembly of the ceiling diffuser much easier. A volumetric flow meter can be integrated in the connection spigot of the plenum box at an extra charge. The measurement error of the volumetric flow meter is  $\pm 5\%$  at a connection spigot velocity of 2-5 m/s and a straight flow pattern of at least  $1 \times D$ . The measurement is carried out with dismantled diffuser. By adjusting the throttle damper, the required air volume of each diffuser can be set quickly and correctly.

With the ROB model of the SK-Q-... plenum box the diffuser plate, damper and volumetric flow meter can be removed to allow duct cleaning robots into the ductwork from room side.

For square and round supply air models with SM mounting or for installation in grid ceilings, the ceiling impulse diffuser is

connected to ductwork via a reduction piece type RF.

The ceiling impulse diffuser has been tested successfully by TÜV SÜD in accordance with the following regulations:

- VDI 6022 Sheet 1: Hygienic requirements of ventilation and air-conditioning systems
- VDI 6022 Sheet 2: Hygienic requirements of ventilation and air-conditioning systems - Measurement methods and investigations during hygienic controls and hygienic inspections
- DIN 1946 Sheet 2: Air-conditioning technology - Health requirements

### Minimum volumetric flow range $V_{min}$ ( $\Delta T = -12 K$ )

NW	$V_{min}$			
	PIL-N-...		PIL-G-...	
	(m <sup>3</sup> /h)	(l/s)	(m <sup>3</sup> /h)	(l/s)
310	80	22	-	-
400	100	28	150	42
500	150	42	200	56
600 / 625	300	83	350	97

### Attention!

**The correct functioning of the ceiling impulse diffuser type PIL-... is only guaranteed in connection with the plenum box type SK-... suitable for PIL- diffusers!**

### Comparison of PIL-G with PIL-N for NW 600/625

	PIL-N-...	PIL-G-...	Difference
$L_{WA}$ [dB(A)]	35	35	
$\Delta p_t$ (Pa)	26	18	-32%
$V_{ZU}$ (m <sup>3</sup> /h)	500	760	+52%

## Ceiling Impulse Diffuser Model PIL

### Square designs

PIL-...-QV-...

V drill pattern

PIL-...-QS-...

S drill pattern

PIL-...-QK-...

K drill pattern

### Round designs

PIL-...-RV-...

V drill pattern

PIL-...-RS-...

S drill pattern

PIL-...-RK-...

K drill pattern

**Note:** Only the square model with V drill pattern is available in aluminium.

## Construction

Faceplate

- perforated sheet steel painted RAL 9010 (white)
- perforated natural colour anodised aluminium (available only for PIL-...-QV-... model)

baffle plate

- Sheet steel painted to RAL 9005 (black), only for supply air model

Funnel

- Sheet steel painted to RAL 9005 (black), only for supply air model

## Model

PIL-N-... - for standard air volumes, supply air and return air

PIL-G-... - for large air volumes, only for supply air

PIL-...-QV-... - square front plate, offset perforations

PIL-...-QS-... - square design, star-shaped perforations (not possible in aluminium)

PIL-...-QK-... - square design, circular perforation (not possible in aluminium)

PIL-...-RV-... - round front plate, displaced perforations

PIL-...-RS-... - round design, star-shaped perforations (not possible in aluminium)

PIL-...-RK-... - round design, circular perforation (not possible in aluminium)

PIL-...-Z-... Supply air

PIL-...-A-... Return air (not for PIL-G)

## Fastening

Concealed mounting (-VM)

- Traverse fixing, by means of M6 cylinder screw (to DIN EN ISO 4762) at the plenum box.

Screw mounting (-SM)

- only for models with ball-impact guard or in combination with a reduction piece
- with raised countersunk head tapping screws (on site)

## Ceiling Impulse Diffuser Model PIL

### Accessories

Plenum box SK-Q-... and SK-R-...)

- Galvanised sheet steel, with integrated perforated straightener (supply air model only) and fixing lugs.

Damper (-DK1)

- Damper fastening made of plastic
- Galvanised sheet steel

Damper (-DK2)

- DK1 with cable-operated adjustment

Rubber lip seal (-GD1)

- Special rubber

Volumetric flow meter (-VME1)

- Aluminium connections
- Measuring sensor made of plastic
- holder made of galvanised sheet steel

ROB version (-ROB1)

- only possible for SK-Q-... plenum box
- Removable diffuser plate, damper and volumetric flow meter

Ball-impact guard (-BS)

- only possible for PIL-...-Q...-... with SM mounting.
- Steel painted to RAL 9010 (white), other RAL colours possible at an extra charge.

Internal insulation (-li)

- thermal insulation at the inside of the plenum box

External insulation (-la)

- thermal insulation at the outside of the plenum box

Reduction piece (-RF)

- Galvanised sheet steel
- for connection to ducts without plenum box
- for supply air models with SM mounting only or for installation in grid ceilings (not possible for PIL-G-...)

## Fastening methods

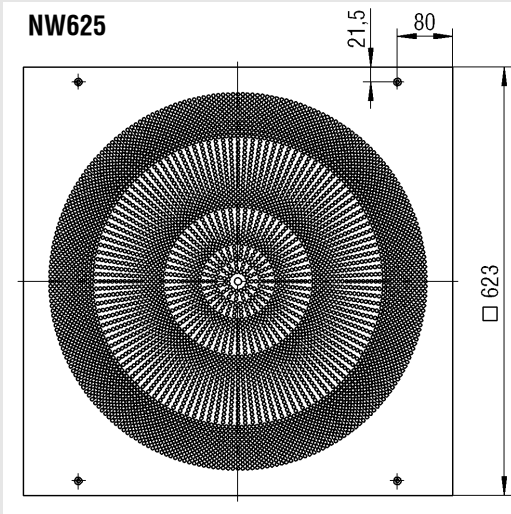

### Screw mounting (-SM) (only PIL-...-Q...-...)

only for models with ball-impact guard or in combination with a Reduction piece

with indentation for slotted shallow-raised countersunk-head tapping screw (on-site)

- NW 310:  
DIN ISO 7051 pitch 3.9
- NW 400-625:  
DIN ISO 7051 pitch 4.8

### Concealed mounting (-VM)

In concealed mounting, the ceiling impulse diffuser type PIL-... is fixed to the plenum box by means of a pole brace and an M6 cylinder head screw (to DIN EN ISO 4762).

**Attention: The max. torque of the fastening screw is 0.4 Nm**

Ceiling impulse diffuser type PIL | for standard air volume | square faceplate, drill pattern V (standard) | supply air | NW500 | faceplate made of sheet steel | RAL 9010 white | drill pattern not reduced | concealed mounting | without ball-impact guard | without reduction piece

#### Order details

##### 01 - Type

PIL = Ceiling impulse diffuser

##### 02 - Air volume

N = Normal

G = Large

##### 03 - Model

QV = Square faceplate, drill pattern V (standard)

QS = Square faceplate, drill pattern S

QK = Square faceplate, drill pattern K

RV = round faceplate, drill pattern V

RS = round faceplate, drill pattern V S

RK = round faceplate, drill pattern K

Only -QV model is available in aluminium.

##### 04 - Air throw

Z = Supply air

A = Return air (not possible for PIL-G-...)

##### 05 - Nominal size

310 = NW 310 (not possible for PIL-G-...)

400 = NW 400

500 = NW 500

600 = NW 600

625 = NW 625

##### 06 - Material

SB = Sheet steel (standard)

AL = Aluminium (natural colour anodised) (for PIL-...-QV-... only)

##### 07 - Paint

9010 = RAL colour white (standard)

xxxx = RAL colour can be freely selected

ELOX = natural colour anodised (only possible for aluminium)

The RAL colours are also possible for aluminium.

##### 08 - Drill pattern reduced

000 = Drill pattern not reduced (standard)

310 = reduced drill pattern 310 (not possible for PIL-G-...)

400 = reduced drill pattern 400

500 = reduced drill pattern 500

The drill pattern selected must be smaller than the nominal size selected.

##### 09 - Mounting

VM = Concealed mounting (standard)

SM = Screw mounting (only in combination with ball-impact guard or reduction piece)

##### 10 - Ball-impact guard

B0 = without ball-impact guard (standard)

BS = with ball-impact guard painted to the same colour as the faceplate (for square model only)

##### 11 - Reduction piece

R0 = without reduction piece (standard)

RF = with reduction piece for connection to ductwork (for supply air model with SM mounting only or for installation in grid ceilings, not possible for PIL-G-...).

### Specification texts

Square ceiling impulse diffuser for installation in supply and exhaust air systems in clean rooms, operating theatres and comfort rooms up to a height of 4 m.

Consisting of an easy to clean square perforated sheet steel front plate displaced with punch outs, painted RAL 9010 (white) or anodised aluminium in natural colour (natural colour anodised aluminium not available in the S model). The supply air model is additionally provided with a baffle plate and a sheet steel air guide funnel painted to RAL 9005 (black). It is fastened by concealed mounting (-VM) using a central fastening screw. TÜV inspected according to **VDI 6022 Sheets 1+2**, as well as **DIN 1946 Sheet 2**

Product: SCHAKO **type PIL-N-QV-Z-...**

- for large air volumes: product: SCHAKO **type PIL-G-QV-Z-...**

- star-shaped perforations (not possible in aluminium)

Product: SCHAKO **type PIL-N-RV-A-...**

- Return air version without baffle plate and without air guide funnel Star-shaped perforations. (not possible in aluminium)

Product: SCHAKO **type PIL-N-RS-A-...**

- Return air version without baffle plate and without air guide funnel Circular perforation. (not possible in aluminium)

Product: SCHAKO **type PIL-N-RK-A-...**

## Ceiling Impulse Diffuser Model PIL

### Accessories:

- Plenum box (SK-Q-... and SK-R-...) made of galvanised sheet steel, with fixing lugs.
  - Supply air model with integrated perforated straightener.
  - Return air model inside painted to RAL 9005 (black)
  - with damper (-DK1) in plenum box, adjustable from below, for simple air volume regulation without dismantling the faceplate.
  - adjustable from below with cable (-DK2)
  - with volumetric flow meter (-VME1).
  - with ROB model (-ROB1), removable diffuser plate, damper and volumetric flow meter (only SK-Q-...)
  - with rubber lip seal (-GD1), at the connection spigot made of special rubber.
  - with thermal insulation
    - internal (-li)
    - external (-la)
  - Height of plenum box can be freely selected, xxx in mm, minimum height = spigot diameter + 102 mm with SK-Q-... and spigot diameter +137 mm with SK-R-..., but at least 235 mm)
  - Spigot diameter can be freely selected, xxx in mm
  - Spigot position:
    - S0= spigot from above
    - S1= 1 lateral spigot on the box (standard)
    - S2= 2 spigots offset by 90°
    - S3= 2 spigots offset by 180°
    - S5 = 2 spigots arranged next to each other
- Reduction piece made of galvanised sheet steel in the connection to ductwork (-RF), only for supply air model without plenum box
