## FIELD OF APPLICATION

Volumetric flow controller for supply and return air systems, suitable for regulating a constant volumetric flow with the option of electrical setpoint adjustment.

### ATTENTION

The VMR / VMPQ is an adjusted controller working by the mechanism of action principle. Tampering with the controller, whether manually or mechanically, are prohibited. When a high volumetric flow setting has been selected, the damper leaf must never be closed manually. Otherwise, the control mechanism will be changed, resulting in a loss of control accuracy. The field of application must always be complied with. If the VMR / VMPQ is used beyond its allowed field of application, this will result in mechanical overload and thus in a loss of control accuracy.

We would like to point out that to clean the stainless steel design, only suitable corresponding cleaning materials must be used.

## CORRECTION FACTORS REGARDING THE AIR VOLUMES

For  $\Delta p \geq 500$  Pa deviations of up to 20 % of the set value can occur.

Maximum deviation from the set value: NW 80

Air velocity	2-5 m/s	$\pm 20\%$
Air velocity	5-6 m/s	$\pm 15\%$
Air velocity	7-8 m/s	$\pm 10\%$
Scale accuracy		$\pm 4\%$

Maximum deviation from the set value:

Air velocity	1-4 m/s	$\pm 20\%$
Air velocity	4-5 m/s	$\pm 10\%$
Air velocity	5-7 m/s	$\pm 8\%$
Air velocity	7-10 m/s	$\pm 6\%$
Scale accuracy		$\pm 4\%$

## USEABLE VOLUMETRIC FLOW RANGES

### Volumetric flow ranges for VMR

NW (mm)	V <sub>ZU</sub> (m <sup>3</sup> /h)		V <sub>ZU</sub> [l/s]	
	min.	max.	min.	max.
80	45	125	13	35
100	50	230	14	64
125	120	400	33	111
160	130	640	36	178
200	150	1050	42	292
250	300	1500	83	417
315	650	2450	181	681
400	700	4200	194	1167

### Volumetric flow ranges for VMPQ

B x H (mm)	V <sub>ZU</sub> (m <sup>3</sup> /h)		V <sub>ZU</sub> [l/s]	
	min.	max.	min.	max.
200 x 100	200	800	56	222
300 x 100	325	1075	90	299
300 x 150	250	1500	69	417
300 x 200	225	1800	63	500
400 x 200	500	2050	139	569
400 x 250	850	3200	236	889
400 x 300	700	3600	194	1000
400 x 400	900	4400	250	1222
500 x 200	650	3100	181	861
500 x 250	950	4200	264	1167
500 x 300	1200	4800	333	1333
500 x 400	1300	6200	361	1722
600 x 200	450	4100	125	1139
600 x 250	1200	4600	333	1278
600 x 300	1700	5800	472	1611
600 x 400	1900	8200	528	2278

For the parameter setting of the control components, an air density of 1.2 kg/m<sup>3</sup> has been taken into account. When the air volume drops below the V<sub>min</sub> shown in the chart, the correct functioning of the volumetric flow controller is no longer guaranteed.

## FUNCTION

The constant volumetric flow controller VMPR/ VMPQ works independently without requiring additional energy. The central, ball-bearing flap is moved by the air current. The control unit with control cam, spring and damper is attached to the outside of the galvanised sheet steel housing. The required volumetric flow is set in-factory. An adjustment of the volumetric flow at a later stage is possible (setting cam on housing). The control unit is protected with a cover. The controller can be assembled in any assembly position.

- Operating temperature: 10 – 50 °C
- Differential pressure range 50 - 1000 Pa
- Housing leakage according to DIN EN 1751, class C

The mechanical volumetric flow controller VMPR / VMPQ with actuator is suitable for adjusting the supply or return air volume to varying room occupations. Should this become necessary, it can be done without removing the false ceiling.

As-delivered the volumetric flow controllers VMPR/ VMPQ are set to  $V_{min}$ . The controller must be connected on-site to the power supply and then adjusted on-site to the desired controller position. The control unit, including regulating curve, spring, damper and actuator is attached to the outside of the galvanised sheet steel housing. The required volumetric flow is set in-factory.

Thanks to the actuator, the volumetric flow controller can be adjusted without problems to the required volumetric flow within the controller range. If a mechanical limitation of the controller range by means of stops is selected for the drive, the following setting values are possible:

To avoid unnecessary controller errors, the information given on p. 9 should be observed. The setting values for actuators with constant control can be obtained from the controller settings. In OPEN / CLOSED actuators, the control setting is effected through a mechanical limit.

- Limit stops for a mechanical limitation can only be achieved in the scale ranges 1-7 and 3-10 (see also: controller setting table)

## PROCESSING

### Housing

Galvanised sheet steel (standard) (-SV)  
Galvanised sheet steel with DD coating (-DD)  
Stainless steel 1.4301 (V2A) (-V2) or 1.4571 (V4A) (-V4)

### Control damper

Aluminium (VMPR for NW <=160)  
Aluminium with DD coating (VMPR for NW </=160)  
Galvanised sheet steel (VMPR for NW >160 | VMPQ)  
Galvanised sheet steel with DD coating (VMPR for NW >160 | VMPQ)  
Stainless steel 1.4301 (V2A) or 1.4571 (V4A), optionally to galvanised sheet steel at an extra charge

### Control unit housing

Plastic, halogen-free  
Stainless steel 1.4301 (V2A) or 1.4571 (V4A)

## ACCESSORIES

### Acoustic cladding (-DS 2)

Made of sound-absorbing, insulating 20 mm material, non-flammable to DIN 4102-17, with sheet steel casing made of galvanised sheet steel (standard), stainless steel 1.4301 (V2A) or 1.4571 (V4A), with cage nuts (M6) (VMPQ only)

### Flat-bed acoustic cladding (-FD1) - VMR only

Made of sound-absorbing, insulating 3 mm material with sheet steel casing made of galvanised sheet steel (standard), stainless steel 1.4301 (V2A) or 1.4571 (V4A)

### Flat flange (-FF1/-FF2) - VMR only

on both sides, to DIN 24 154/5, made of the same material as the housing

### Rubber lip seal (-GD1) - VMR only

on both sides, special rubber, silicone-free

### METU flange (-MF1/-MF2) - VMR only

on both sides, duct flange

### Counter flange (-GF) (pair), loose - VMR only

on both sides, to METU flange

### Tension ring (-SR) (pair), loose - VMR only

to connect METU flange to counter flange

### Mineral wool silencer (-ZSQ) - VMPQ only

- Housing made of galvanised sheet steel (standard), stainless steel 1.4301 (V2A) or 1.4571 (V4A)
- Baffle frame made of galvanised sheet steel (standard), stainless steel 1.4301 (V2A) or 1.4571 (V4A), on both sides with METU profile M2
- Mineral fibre boards according to DIN 4102 A2, with glass filament cover, biosoluble, abrasion-resistant

### Duct silencer (-RS) - VMR only

- Rigid design
- Outer casing and perforated plate made of galvanised sheet steel (standard), stainless steel 1.4301 (V2A) or 1.4571 (V4A).
- Mineral wool filling

### Electric actuator (-E044/-E045/-E046/-E016)

3-point control (standard):

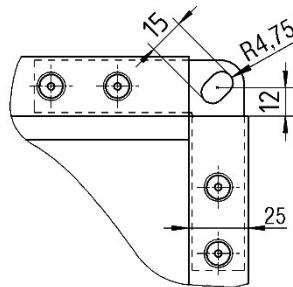

- VMR/VMPQ-...-E044; 24 V
- VMR/VMPQ-...-E045; 230 V

Constant control:

- VMR/VMPQ-...-E046; 24 V
- VMR/VMPQ-...-E016; 230 V

### Corner angle - VMPQ only

As standard, the volumetric flow controller VMPQ is delivered with corner angle. The special form of the corner holes allows them to be connected to the connection systems available on the market (e.g. METU system M 2/M 3)

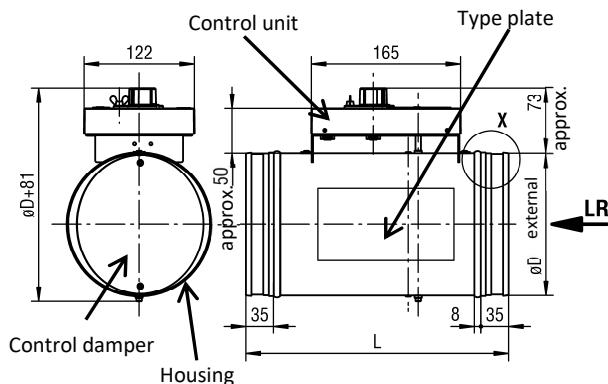

### Please note!

Tension rings, counter flanges and duct silencers must be ordered separately and are supplied loose!

## DIMENSIONS OF VMPR / VMPQ

### VMPR

Round design, for duct connection to DIN EN 1506, position-independent installation.

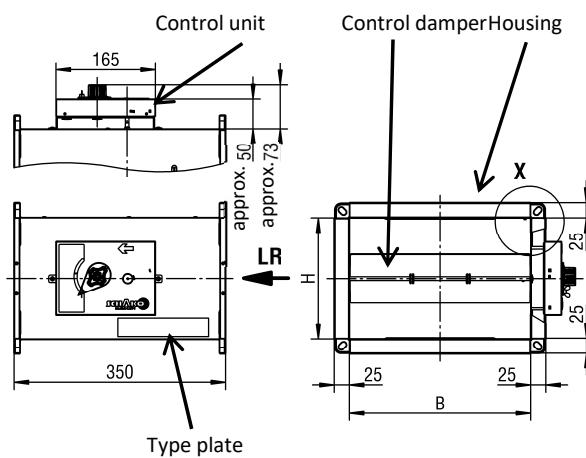

### Available sizes for VMPR

NW	$\phi D$	L
80	78	290
100	98	290
125	123	290
160	158	290
200	198	290
250	248	390
315	313	390
400	398	490

### VMPQ

Rectangular design, for duct connection to DIN 1505, right-hand design

The VMPQ is only delivered in right-hand design. If it is necessary to arrange the control unit on the left-hand side, then the VMPQ must be rotated by 180°.

### Available sizes for VMPQ

Height H	Width B				
	200	300	400	500	600
100	x	x	-	-	-
150	-	x	-	-	-

**PRIOR TO ASSEMBLY AND COMMISSIONING**

An instruction leaflet containing information on safety, transport, disposal, installation, commissioning and maintenance is enclosed with each SCHAKO product. For safety reasons, this instruction leaflet must be read under all circumstances and completely adhered to.

**MARKING**

These devices are not suitable for use in non-approved Ex zones. The operating safety of the devices is only guaranteed when used in accordance with their designated use.

**DISPOSAL**

The devices have been prepared in accordance with the RoHS directive restricting the use of certain hazardous substances in electrical and electronic equipment (2002/95/EC). After its final decommissioning, the volumetric flow controller must be properly disposed of.

**TESTS AND STANDARDS**

The volumetric flow controller VMPR/VMPQ has been tested by the notified body in accordance with the following regulations:

**Completed tests**

- VDI 6022, Sheet 1: Hygienic requirements of ventilation and air-conditioning systems
- DIN 1946, Sheet 2: Air-conditioning technology - Health requirements
- DIN EN 13779 (2007): Ventilation of non-residential buildings

**Applied standards**

- Leakage air: EN 1751 (2011-02)
- EMV 2014/30/EU

**INSTALLATION-MAINTENANCE-SERVICE****Required distances**

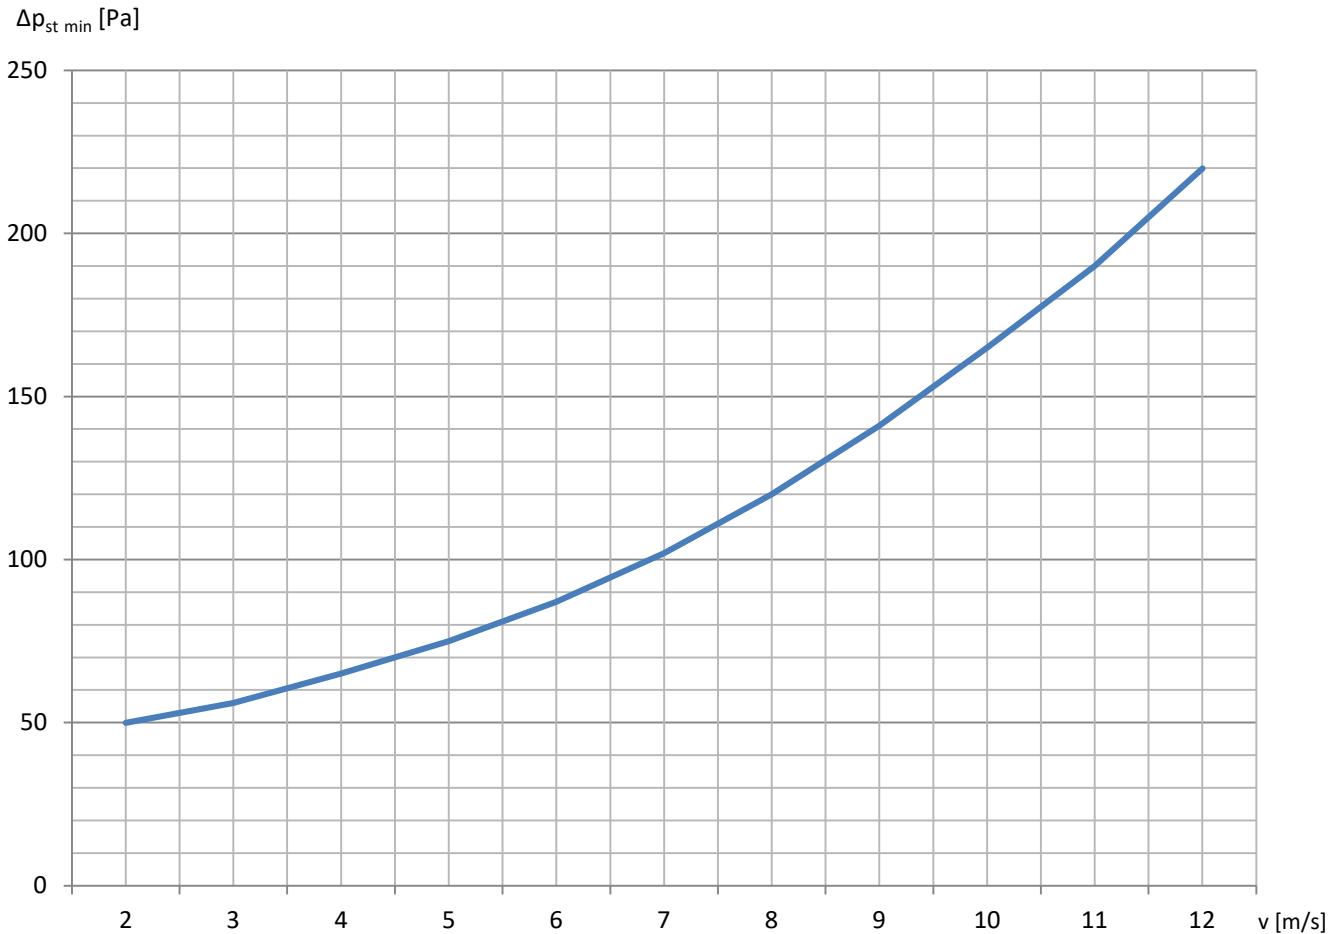

To avoid unnecessary controller errors, the min. distances according to the following table / drawings must be observed. For combinations of several connection pieces or pieces with fire dampers or silencers, the larger minimum distances must be observed. All volumetric flow controllers can be assembled with horizontal or vertical damper axis.

Distance to	VMPR	VMPQ
Bent connection spigot	1 x D	1 x diagonal
Other connection pieces (e.g. T-junction, branching piece, reduction piece, etc.)	2 x D	2 x diagonal
Fire Damper	2 x D	2 x diagonal
Silencer	2 x D	2 x diagonal

**Mounting**

The controllers must be assembled in a way to allow inspection. The volumetric flow controllers are not suitable for air containing sticky and greasy components.

- When the device is delivered, check whether the controllers are complete and have not been damaged during transport. Complaints have to be communicated immediately and directly to the transporter and SCHAKO .
- Volumetric flow controllers must not be carried on the regulation components or the damper blade, but only on the housing.
- The controllers must be carefully stored on-site. They must be protected from dust, dirt and from direct weather effects.
- The assembly must be done by skilled personnel, observing recognised technical rules and regulations.

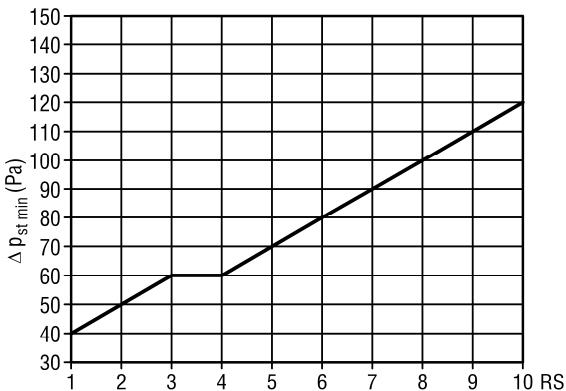

**MINIMUM STATIC PRESSURE DIFFERENCE****VMR / VMPQ**

400	1	4	11	19	25	20	11	7
500	1	4	7	8	15	15	8	5
600	1	3	9	18	36	37	22	13

## CALCULATION FORMULAE

Calculation of the volumetric flow

$$\dot{V} = v_K \times F \times 3600$$

where :  $v_K$  (m/s) = duct velocity |  $F$  ( $\text{m}^2$ ) = area

Example for diameter 200 mm

$$v_K = 4 \text{ m/s}$$

$$F = 0.0314 \text{ m}^2$$

$$\dot{V} = V_k \times F \times 3600 = 4 \text{ m/s} \times 0.0314 \text{ m}^2 \times 3600$$

$$\dot{V} = 452 \text{ m}^3/\text{h}$$

## LEGEND

$\Delta L_w$ [dB/Okt]	= Level correction value / octave
$\Delta p$ (Pa)	= Pressure difference
$\Delta p_{st\ min}$ [Pa]	= minimum static pressure difference
$\Delta p_{st}$ [Pa]	= pressure loss
$\Delta p_w$ (Pa)	= Effective pressure
A ( $\text{m}^2$ )	= Inflow area (W x H)
B (mm)	= Width
D <sub>e</sub> [dB/Okt]	= Insertion loss
EW <sub>Vmax</sub> ( $\text{m}^3/\text{h}$ )	= maximum air volume set value
f <sub>m</sub> (Hz)	= Octave band centre frequency
H (mm)	= Height
K	= Baffle thickness
KA (-x-)	= Number of baffles
KF (-x-)	= Correction factor
LOA	= number of holes
L <sub>w abst</sub> [dB/Okt]	= Radiated noise / octave
L <sub>w</sub> [dB/Okt]	= Sound power level/octave ( $L_w = L_{w1} + KF$ )
L <sub>w1</sub> [dB/Okt]	= Sound power level / octave, relative to 1 $\text{m}^2$ of inflow area
L <sub>WA</sub> [dB(A)]	= A-weighted sound power level ( $L_{WA} = L_{WA1} + KF$ )
NW (mm)	= Nominal width
S	= Gap width
V ( $\text{m}^3/\text{h}$ ) [ $\text{l}/\text{s}$ ]	= air volume
V <sub>ZU</sub> ( $\text{m}^3/\text{h}$ ) [ $\text{l}/\text{s}$ ]	= supply air volumetric flow
V <sub>max</sub> ( $\text{m}^3/\text{h}$ ) [ $\text{l}/\text{s}$ ]	= maximum air volume
V <sub>min</sub> ( $\text{m}^3/\text{h}$ ) [ $\text{l}/\text{s}$ ]	= minimum air volume
V <sub>Nenn</sub> ( $\text{m}^3/\text{h}$ ) [ $\text{l}/\text{s}$ ]	= nominal air volume
$\dot{V}$ ( $\text{m}^3/\text{h}$ ) [ $\text{l}/\text{s}$ ]	= volumetric flow
v <sub>K</sub> (m/s)	= duct velocity
$\emptyset D$ (-)	= hydraulic diameter
$\rho$ (kg/m <sup>3</sup> )	= Density
RS	= controller position

## VMPR ORDER CODE

01	02	03	04	05	06	07
Type	Nominal width	Material	Volumetric flow set value $V_{kon}$	Duct connection	Acoustic cladding	Actuator
<b>Example</b>						
VMPR	-125	-SV	-0180	-GD1	-DS2	-E000

### Sample

**VMPR-125-SV-0180-GD1-DS2-E000**

Volumetric flow controller type VMPR, round design | nominal width NW 125 | galvanised sheet steel | with set value  $V_{kon}=180$  m<sup>3</sup>/h | with rubber lip seal | with acoustic cladding 20 mm | without actuator

### ORDER DETAILS

#### 01 - Type

VMPR = VMPR volumetric flow controller, round design

#### 02 - Nominal width

- 080 = NW 80 mm
- 100 = NW 100 mm
- 125 = NW 125 mm
- 160 = NW 160 mm
- 200 = NW 200 mm
- 250 = NW 250 mm
- 315 = NW 315 mm
- 400 = NW 400 mm

#### 03 - Material

- SV = galvanised sheet steel (standard)
- V2 = stainless steel V2A, 1.4301
- V4 = stainless steel V4A, 1.4571
- DD = DD-coating on the inside with galvanised sheet steel

#### 04 - Volumetric flow set value $V_{kon}$ (provided by customer)

xxxx = value must be entered with 4 digits

#### 05 - Duct connection

- KA0 = without rubber lip seal / without flange (standard)
- GD1 = with rubber lip seal
- FF1 = flat flange, galvanised steel
- FF2 = flat flange, stainless steel V2A 1.4301
- MF1 = METU flange, galvanised steel
- MF2 = METU flange, stainless steel V2A 1.4301

#### 06 - Acoustic cladding

- DS0 = without acoustic cladding (standard)
- DS2 = acoustic cladding 20 mm
- FD1 = flat-bed acoustic cladding 3 mm

#### 07 - Actuator

- E000 = no actuator (standard)
- E044 = LM24A-F; 24 V, 3-point, OPEN/CLOSED
- E045 = LM230A-F; 230 V, 3-point, OPEN/CLOSED
- E046 = LM24A-SR-F; 24 V, continuous 2-10 V
- E016 = LM230A-SR-F; 230 V, continuous 2-10 V

#### Please note!

Tension rings, counter flanges or duct silencers must be ordered separately and are supplied loose!

## ORDER CODE VMPQ

01	02	03	04	05	06	07
Type	Width	Height	Material	Volumetric flow set value $V_{kon}$	Acoustic cladding	Actuator
<b>Example</b>						
VMPQ	-200	-100	-DD	-0400	-DS2	-E000

### Sample

**VMPQ-200-100-DD-0400-DS2-E000**

Volumetric flow controller type VMPQ, rectangular design | width 200 mm | height 100 mm | galvanised sheet steel with DD coating | with set value  $V_{kon}= 400 \text{ m}^3/\text{h}$  | with acoustic cladding 20 mm | without actuator

### ORDER DETAILS

#### 01 - Type

VMPQ = VMPQ volumetric flow controller, rectangular design

#### 02 - Width

200 = 200 mm  
300 = 300 mm  
400 = 400 mm  
500 = 500 mm  
600 = 600 mm

#### 03 - Height

100 = 100 mm  
150 = 150 mm  
200 = 200 mm  
250 = 250 mm  
300 = 300 mm  
400 = 400 mm

#### 04 - Material

SV = galvanised sheet steel (standard)  
V2 = stainless steel V2A, 1.4301  
V4 = stainless steel V4A, 1.4571  
DD = DD-coating on the inside with galvanised sheet steel

#### 05 - Volumetric flow set value $V_{kon}$ (provided by customer)

Xxxx = value must be entered with 4 digits.

#### 06 - Acoustic cladding

DS0 = without acoustic cladding (standard)  
DS2 = acoustic cladding with 20 mm

#### 07 - Actuator

E000 = no actuator (standard)  
E044 = LM24A-F; 24 V, 3-point, open/closed  
E045 = LM230A-F; 230 V, 3-point, open/closed  
E046 = LM24A-SR-F; 24 V, continuous 2-10 V  
E016 = LM230A-SR-F; 230 V, continuous 2-10 V

#### Please note!

Silencers must be ordered separately!

**ORDER CODE ZSQ**

<b>01</b>	<b>02</b>	<b>03</b>	<b>04</b>	<b>05</b>
Type	Width	Height	Material	Profiled connection
<b>Example</b>				
ZSQ	-0600	-0400	-SV	-M2

**Sample****ZSQ-0600-0400-SV-M2**

Mineral wool silencer, rectangular design, with baffle type MWK-OB | width 600 mm | height 400 mm | galvanised sheet steel | with METU flange M2

**ORDER DETAILS****01 - Type**

ZSQ = Mineral wool silencer, rectangular design, with  
Baffles type MWK-OB

**02 - Width**

xxxx = value must be entered with 4 digits  
(0200 to 0600 mm)

**03 - Height**

xxxx = value must be entered with 4 digits  
(0100 to 0400 mm)

**04 - Material**

SV = galvanised sheet steel

**05 - Profile connection**

M2 = Metu profile M2 for VMPQ

## SPECIFICATION TEXT VMPR

### Round model

Mechanical volumetric flow controller type VMPR, in round design, position-independent installation, for constant volumetric flow control up to a max. differential pressure of 1000 Pa, for duct connection to DIN EN 1506. Housing and control damper made of galvanised sheet steel (-SV), control housing made of plastic.

**Product: SCHAKO type VMPR**

NW .....

Housing and control damper (at an extra charge) made of:

- Galvanised sheet steel with DD-coating (-DD)
- Stainless steel 1.4301 (-V2)
- Stainless steel 1.4571 (-V4)

Control housing (at an extra charge) made of:

- Stainless steel 1.4301 (-V2)
- Stainless steel 1.4571 (-V4)

### **Accessories (at an extra charge):**

- Acoustic cladding (-DS2), made of 20 mm sound-absorbing material, non-flammable according to DIN 4102-17, with sheet metal casing.
- Flat-bed acoustic cladding (-FD1), made of 3 mm sound-absorbing material with sheet metal casing.
- METU flange (-MF1/-MF2), on both sides, duct flange AF.
- Counter flange (-GF) (pair), loose, on both sides, for METU flange.
- Tension ring (-SR) (pair), loose, for connecting the METU flange to the counter flange.
- Flat flange (-FF1/-FF2), on both sides, according to DIN 24 154 / 5, made of the same material as the housing.
- Rubber lip seal (-GD1), on both sides, made of special rubber, silicone-free.
- Duct silencer (-RS), outer casing and perforated plate made of galvanised sheet steel or stainless steel 1.4301 (V2A) or 1.4571 (V4A) (at an extra charge), with mineral wool filling.
- Electric actuator (-E), 3-point control (standard, VMPR-...-E044; 24 V, VMPR-...-E045; 230 V) or constant control (VMPQ-...-E046; 24 V, VMPQ-...-E016; 230 V), for adapting the supply air and return air volume to varying room occupations.

## VMPQ SPECIFICATION TEXT

### Rectangular model

Mechanical volumetric flow controller type VMPQ, in rectangular design, right-hand model, for constant volumetric flow control up to a max. differential pressure of 1000 Pa, for duct connection to DIN EN 1505. Housing and control damper made of galvanised sheet steel (-SV), control housing made of plastic.

**Product: SCHAKO type VMPQ**

Size ..... x ..... (width x height)

Housing and control damper (at an extra charge) made of:

- Galvanised sheet steel with DD-coating (-DD)
- Stainless steel 1.4301 (-V2)
- Stainless steel 1.4571 (-V4)

Control housing (at an extra charge) made of:

- Stainless steel 1.4301 (-V2)
- Stainless steel 1.4571 (-V4)

### **Accessories (at an extra charge):**

- Acoustic cladding (-DS2) made of 20 mm sound-absorbing material, non-flammable according to DIN 4102-17, with sheet metal casing and M6 cage nuts.
- Mineral wool silencer (-ZSQ) with METU profile M2 on both sides, housing (L=1500) made of galvanised sheet steel or stainless steel 1.4301 (V2A) or 1.4571 (V4A) (at an extra charge), with integrated MWK sound-absorbing baffles (L=1000). The MWK silencing baffles with RAL quality seal consist of abrasion-resistant mineral fibre boards covered with fibre glass filament (biosoluble, non-flammable to DIN 4102) in a frame made of the same material as the mineral wool silencer housing. Baffles measured to ISO/DIS 7235 and to DIN 45646.
- Electric actuator (-E), 3-point control (standard, VMPQ-...-E044; 24 V, VMPQ-...-E045; 230 V) or constant control (VMPQ-...-E046; 24 V, VMPQ-...-E016; 230 V), for adapting the supply air and return air volume to varying room occupations.
