Volumetric flow controller VRAPPs

Description

The volumetric flow controller allows the volumetric flow in ducts to be kept constant or to be regulated using positive control V_{\min} , V_{\max} or "CLOSED". The volumetric flow controller can also be used as a room or duct pressure regulator. In VAV systems the volumetric flow controller can regulate variable volumetric flows between V_{\min} and V_{\max} as a function of the supply air (room temperature controller).

The round volumetric flow controller type VRAPPs made of plastic PPs is suitable for use with air contaminated with aggressive components. The volumetric flow setpoints V_{\min} and V_{\max} can also be altered at the controller at a later stage, even after installation. If the changes in air volume are so large that the calibration curve must be changed, the controllers must either be recalibrated in-factory or the calibration curve must be changed on-site by the customer service of Schako.

Setpoints are initially set in-factory according to the customer's requirements. During this in-factory setting, the functions of all volumetric flow controllers are also checked. The V_{\min} and V_{\max} values can range from 20 to 100 %. The maximum deviation of the volumetric flows is +/- 5%, relative to the nominal volumetric flow V_{nom} , based on a calibration curve of 12 m/sec. At lower flow rates, the deviation in percent may increase.

For the calibration of the controllers, a curve with a flow rate of 12 m/ sec is available. For constant-volume volumetric flow controllers, the V_{\min} value will be set to the desired constant-volume value.

If the calibration curve must be changed on site, the controllers must either be recalibrated ex factory or the calibration curve must be changed on site by the customer service of Schako.

Volumetric flow controllers are in general insensitive to the inflow. 12 measuring points are distributed on the measuring cross based on the median line method. In comparison with measuring rods having only four measuring points or measuring orifices, this gives optimum measurement results.

When using the controllers in systems with heavy dust contamination, suitable filters must be connected upstream. For polluted air or air containing aggressive components, the volumetric flow controllers must be used with an integrated controller with a static membrane pressure sensor. In this case, the notice sign about installation must be observed.

The volumetric flow controllers are not suitable for air containing sticky and greasy components.

For maintenance, service, retrofitting, etc., inspection openings in sufficient number and size must be provided on site.

Field of application

- for supply and return air systems
- for constant or variable volumetric flows
- Positive control V_{\min} , V_{\max} , or "CLOSED"
- suitable for constant and variable volumetric flow or room pressure or duct pressure control
- Differential pressure range from 50 to 1000 Pa
- for duct velocities of 1 - 12 m/s
- for ambient temperatures from 0 to 55°C
- Digesters and contaminated media

Construction

The user must check whether the materials used are suitable for the particular application.

Model

Round design, for duct connection, with silicone-free damper leaf seal made of PUR (NW 110 sealing airtight to DIN EN 1751, Class 2), (NW 125-400 sealing airtight to DIN EN 1751, Class 3), Housing tightness class C to DIN EN 1751.

Volumetric flow controller VRAPPs

Installation

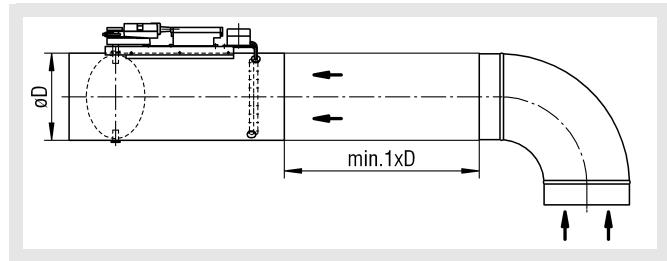

Installation information

To avoid unnecessary controller errors, the min. distances according to the following table / drawings must be observed. For combinations of several connection pieces or pieces with fire dampers or silencers, the larger minimum distances must be observed.

Distance to:

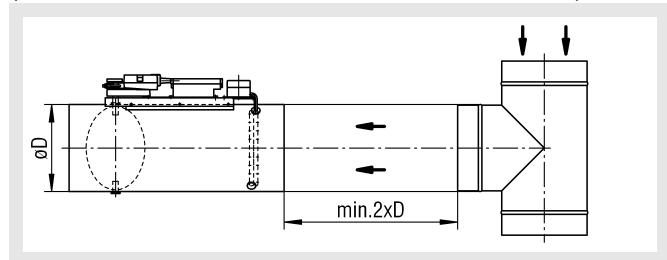

- Bent connection piece	1xD
- other connection pieces: (e.g. T-junction, branching piece, reduction piece, etc.)	2xD
- Fire damper	2xD
- Silencer	2xD

Distance to a bent connection spigot

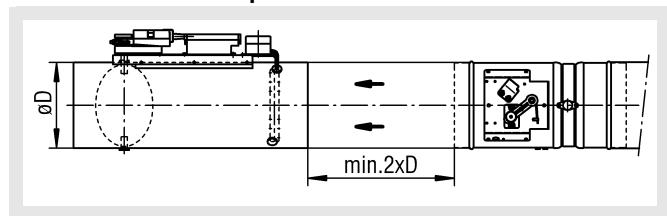

Distance to other connection pieces

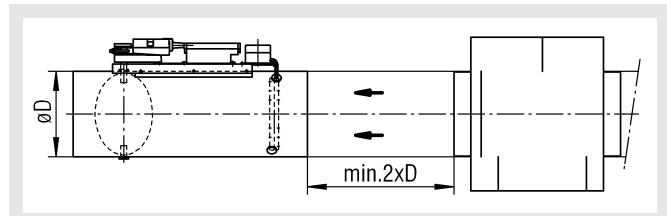

(e.g. T-junction, branching piece, reduction piece, etc.)

Distance to a fire damper

Distance to a silencer

Construction

Housing

- Plastic PP

Damper axle

- Plastic PP

Damper blade

- Plastic PP

Damper leaf seal

- Silicone-free made of PUR (NW 110 sealing airtight to DIN EN 1751 Class 2, NW125 - 400 sealing airtight to DIN EN 1751 Class 3)

Measuring cross

- Plastic PP

Control and driving console

- Plastic PP

Model

- VRAPPs
 - round design, with plastic damper blade with silicone-free damper blade seal (NW 110 sealing airtight to DIN EN 1751 Class 2, NW 125-400 sealing airtight to DIN EN 1751 Class 3)
 - Housing tightness class C to DIN EN 1751.
 - ...A... with electric controller
 - Control voltage 24 V AC 50/60 Hz
 - alternatively with spring return actuator zero-current "CLOSED" or zero-current "OPEN" (at an extra charge).
 - alternatively with high-speed actuator running time 3-5 sec. for 90° angle of rotation (at an extra charge).
 - with pneumatic controller
 - in the design depressurised "CLOSED" (standard) or depressurised "OPEN"
 - Feed pressure 1.2 ± 0.1 bar

Accessories

Flange (-KA0/-FF3) (duct connection)

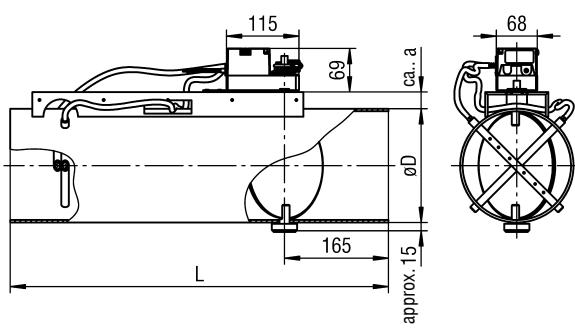

- without flange, butted (-KA0) (standard)
- with flat flange (-FF3), pair, on both sides, made of plastic material PP's.

	l/s	118	236	1419

For the parameter setting of the control components, an air density of 1.2 kg/m³ has been taken into account.

Attention, the following specifications are important for programming the volumetric flow controllers:

- this table merely specifies the complete measuring range of the controller (volumetric flow range)
- If the customer absolutely wants a calibration curve different from 12 m/s, it must be specified! Once it is approved by the competent department, it can be adjusted correspondingly.
- When the air volume drops below the V_{min} shown in the chart, the correct functioning of the volumetric flow controller is no longer guaranteed!
- If only one air volume is specified in the order (as V_{max} value), the volumetric flow controller will be delivered as variable volumetric flow controller. The V_{min} value will be set to the value specified in the catalogue.
- If only one air volume is specified in the order (as V_{min} or $V_{konstant}$ value or without value specification), then the volumetric flow controller will be delivered as a constant volumetric flow controller. The volume specified in the order is set to the V_{min} value, and the V_{max} value is set to 100%.
- The air volumes can be changed using setting devices specific for the controller make, depending on the calibration curve set ex works.
- The controller make Gruner, type 327VM compact, can be used with a sensor linearised to an air velocity of 1 m/s.
- For the parameter setting of the control components (all controllers), an air density of 1.2 kg/m³ has been taken into account.
- Belimo compact controllers are height-compensated. They are calibrated ex works to the system height in question of the specified installation site.
- If no system height is given in the order, the controllers will be set to the elevation of the delivery address.
- If the customer does not specify whether the "Parallel" or "Master/Slave" operating mode is desired, the controller is set for the parallel operation (Master/Slave mode only upon customer request).

Connection diagram

A = LED button
B = Service connection
C = Rotary selector switch
D = Display

I/s (volume) = No square is shown in the display
m³/h (volume) = Only the upper square is shown in the display
Pa (pressure) = Only the middle square is shown in the display
inWC/1000 = The upper & the middle square are shown in the display
α° (angle) = Only the lower square is shown in the display
Cfm = The middle & the lower square are shown in the display

No.	Designation	Wire colour	Function
1		- black	Power supply 24 V AC/DC
2		+ red	
3	Y	white	Input signal 0-10 V DC
4	U	orange	Feedback signal 0-10 V DC
A	CA -	pink	Modbus RTU connection (RS485)
B	CB +	grey	

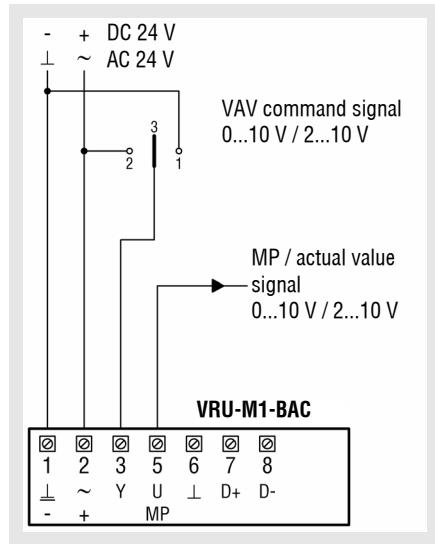

Act / Set:	Display of current value / setpoint value or positive control.
Min:	To set the required min. value (setpoint value Y = 0 / 2 VDC).
Max:	To set the required max. value (setpoint value Y = 10 VDC).
Diag:	Diagnostics menu: y/u - Display of setpoint value / feedback signal oP - opens the damper leaf cL - closes the damper leaf Hi - activates max. value Lo - activates min. value bE - activates intermediate value St - diagnostic mode is on, motor is off Adp - adaptation travel (only 15 Nm or Modbus version) 123 - software version
Mode:	0An (0-10 V DC standard direction of rotation) 2An (2-10 V DC standard direction of rotation)
Adr:	Setting the Modbus address (1...247) and Modbus parameters (if actuator is Modbus-capable).
Nom:	Display & setting of the nominal value, depending on the VAV box (setting is only possible with volumetric flow rate control).
Settings:	327 VAV controllers can be set directly on the display. All 327 VAV controllers can communicate with the setting device GUV3-M or with the setting software Win-VAV2 via the service connection. When using the setting software WIN-VAV2, the GUV3-S serves as an interface converter.
Accessories:	GUV3-M – service plug + setting device GUV3-M WIN-VAV2 bundle – service plug + interface converter GUV3-S + setting software WIN-VAV2

Connection diagram

Setting

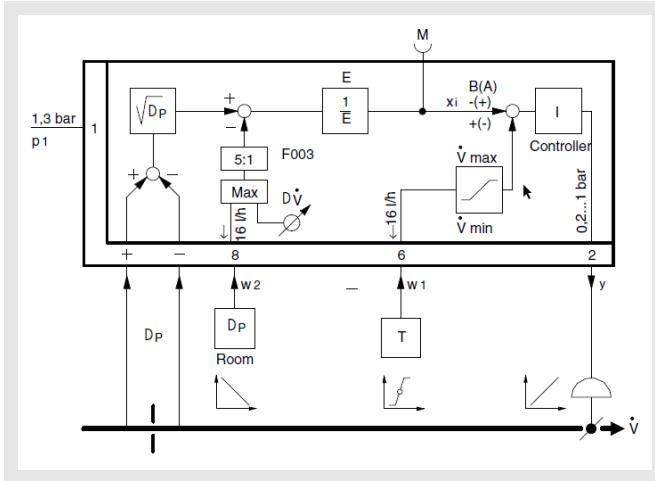

Edit:	The selector value allows values to be changed. The position of the arrow shows the set value. The changes are displayed as soon as the selector is moved $\pm 10^\circ$ out of its position.
Flow / Unit:	To set the desired current volumetric flow unit in m^3/h and l/s.
V_{\min} :	To set the required min. volumetric flow (setpoint value $Y = 0 V / 2 V$)
V_{\max} :	To set the required max. volumetric flow (setpoint value $Y = 10 V$)
Mode:	(To set the direction of rotation) 0-n...0-10 V normal (clockwise) 2-n...2-10 V normal 0-i ...0-10 V inverse (counterclockwise) 2-i ...2-10 V inverse
Diag:	Diagnostics menu: OP = opens the damper leaf CL = closes the damper leaf Hi = activates V_{\max} Lo = activates V_{\min} on = Diagnostic mode is on, motor is off off = Diagnostic mode is off, display Y setpoint
V_{nom} :	To display and set the nominal volumetric flow (by the box manufacturer only).

Calculation formulae

Calculation of the U_5 voltage value

Operating mode: 2 - 10 V DC:

$$U_5 = \frac{V_{\max}}{V_{\text{nenn}}} \times 8V + 2V \quad V_{\max} \text{ values}$$

$$U_5 = \frac{V_{\min}}{V_{\text{nenn}}} \times 8V + 2V \quad V_{\min} \text{ values}$$

Operating mode: 0 - 10 V DC:

$$U_5 = \frac{V_{\max}}{V_{\text{nenn}}} \times 10V \quad V_{\max} \text{ values}$$

$$U_5 = \frac{V_{\min}}{V_{\text{nenn}}} \times 10V \quad V_{\min} \text{ values}$$

Calculation of the V_{nenn} volumetric flow

$$V_{\text{nenn}} = EK \times F \times 3600$$

Attention:

The V_{nenn} value changes as a function of the set calibration curve.

EW (%) = Set value

EK (m/s) = Calibration curve

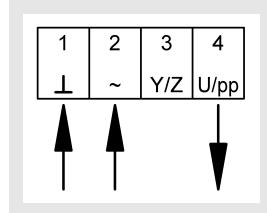

U_5 (V DC) = U_5 signal

F (m^2) = Surface

Volumetric flow controller VRAPPs

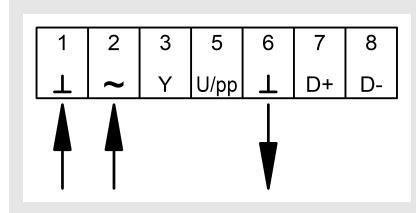

Actual value measurement via feedback signal U_5 using a voltmeter or PC tool

Terminal assignment
327VM/GUAC-...

Supply voltage 24 V AC/DC (terminals 1+2)
Measurement output 2 - 10 V DC (terminals 1+4)
Measurement output 0-10 V DC (terminals 1+4)

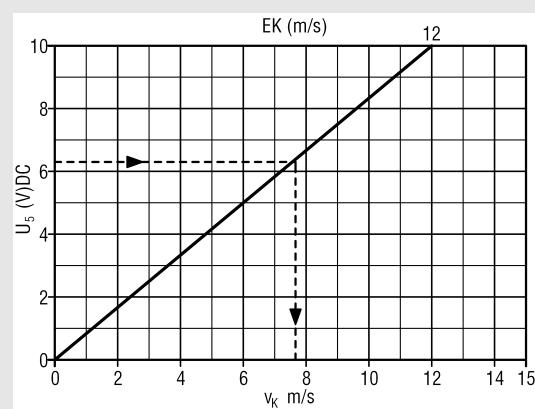

VRU-...

Supply voltage: 24 V AC/DC (terminals 1+2)
Measurement output 2 - 10 V DC (terminals 1+5)
Measurement output 0 - 10 V DC (terminals 1+5)

The actual value signal U_5 is a real feedback of the volumetric flow actual value for monitoring and controlling the air throughput volume.

U_5 signal 0-10 V DC

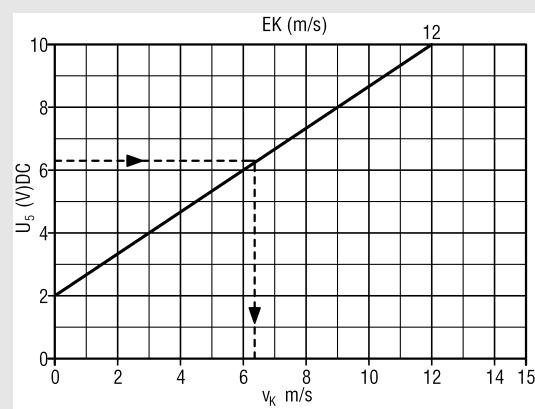

Example

Assume: Measurement output signal $U_5 = 6.3$ V DC
Calibration value VRAPPs = 12 m/sec

Measured value: Duct velocity = 7.6 m/s

Air volume: Duct velocity x area m² x 3600 = m³/h

U_5 signal 2-10 V DC

Example

Assume: Measurement output signal $U_5 = 6.3$ V DC
Calibration value VRAPPs = 12 m/sec

Measured value: Duct velocity = 6.3 m/s

Air volume: Duct velocity x area m² x 3600 = m³/h

Volumetric flow controller VRAPPs

Technical data of controllers and motors

Standard electric controller

327VM-024-10-DS4-MB (Gruner product)

Static pressure sensor, digital VAV and pressure controller as a communication-capable VAV-Compact solution.

Measuring principle:	static pressure measurement (position-independent)
Measuring range sensor:	0...~300 Pa (bursting pressure 1 bar)
Supply voltage:	AC 24 V, 50/60 Hz, DC 24 V
Functional range:	AC 19...29 V / DC 19...29 V
Power consumption:	2.5 W (5 Nm)
Dimensioning:	4.0 VA (5 Nm)
Torque:	min. 5 Nm at the rated voltage (10 Nm, 15 Nm, optional)
Control function:	VAV/CAV/Open-Loop; pressure control, supply/return air or stand-alone operation; master/slave parallel circuit; mixing box control
Setting range V_{\min} to V_{\max} :	$V_{\min} = 0 \dots 100\% \text{ of } V_{\text{nom}}$ $V_{\max} = 0 \dots 100\% \text{ of } V_{\text{nom}}$ $V_{\text{konst.}} = 0 \dots 100\% \text{ of } V_{\text{nom}}$
Command variable Y/Z: (inherent resistance min. 100 kΩ)	DC 0-10 V (0-20 mA at least 500 Ω input resistance) DC 2-10 V (4-20 mA at least 500 Ω input resistance)
Setting range: (actual value signal U/PP)	DC 0-10 V DC 2-10 V
Bus function:	Modbus RTU, hybrid mode
DCC controller:	DCC controller or PLC
Sensor integration:	passive or active sensors (0-10V) for example, humidity, temperature 2-point signal (switching power 16 mA @ 24 V), for example switch, motion de- tector
Protection class:	III (Safety extra low voltage)
Degree of protection:	IP54 (measuring hoses connected)
Measuring air and ambi- ent temp.:	0 °C to +70 °C (medium) 0 °C to +50 °C (environment) 5-95% rela- tive humidity, non-condensing
Storage temperature:	-20 °C to +80 °C
Sound power level:	max. 35 dB(A)
Operation and service:	Using the display by means of a screwdriv- er directly at the device or via the feedback signal.
Communication:	Modbus RTU
Connection:	cable 1000 mm, 4 x 0.75 mm ² (halogen-free), terminals
Dimensions:	115 x 65 x 61 mm
Weight:	approx. 550 g
Maintenance:	maintenance-free

Volumetric flow controller VRAPPs

Alternative electric controller

VRU-M1-BAC (make Belimo)

Self-adapting digital volumetric flow/pressure controller, with integrated static pressure sensor. Position-independent as a communication-capable universal solution with external actuators.

Measuring principle:	static differential pressure measurement
Measuring range sensor:	0... ~600 Pa (bursting pressure +/- 10 kPa)
Sensor functional range:	0... ~600 Pa
Supply voltage:	AC 24 V, 50/60 Hz, DC 24 V
Functional range:	AC 19...29 V / DC 19...29 V
Power consumption:	1.5 W (without actuator)
Dimensioning:	2 VA (with VST actuator)
Control function:	VAV/CAV, STP (pressure), open loop Supply/return air or stand-alone operation; positive control; master/slave or parallel circuit
Setting range: V _{min} /V _{max} (volumetric flow)	V _{min} = 0...100% of V _{nom} V _{max} = 20...100 % of V _{nom} V _{kon.} = 0...100% of V _{nom}
Setting range: P _{min} to P _{max} (pressure)	P _{min} = 0...100% of P _{nom} P _{max} = 20...100% of P _{nom} P _{kon.} = 0...100% of P _{nom}
Bus function:	BACnet MS/TP, Modbus RTU, MP bus
Command variable Y/Z: (inherent resistance min. 100 kΩ)	DC 0-10 V DC 2-10 V variable
Setting range: (actual value signal U)	DC 0-10 V DC 2-10 V variable
Sensor integration:	passive or active sensors (0-10V) for example, humidity, temperature 2-point signal (switching power 16 mA @ 24 V), for example switch, motion detector
Protection class:	III Safety extra-low voltage (SELV)
Degree of protection:	IP42 (measuring hoses and actuator connected)
Ambient temperature:	0 °C to +50 °C (environment), 5-95% relative humidity, non-condensing
Storage temperature:	-20 °C to +80 °C, 5-95% relative humidity, non-condensing
Operation and service:	via the ZTH EU setting device, Belimo Assistant app (NFC, Bluetooth) or via feedback signal/service plug with Belimo PC-Tool
Connection:	Terminals 2.5 mm ²
Dimensions:	170 x 98 x 58 mm
Weight:	approx. 340 g
Maintenance:	maintenance-free

VRU-M1R-BAC (make Belimo)

Self-adapting digital room pressure controller, with integrated static pressure sensor. Position-independent as a communication-capable universal solution with external actuators.

Measuring principle:	static differential pressure measurement
Measuring range sensor:	-75... ~75 Pa (bursting pressure +/- 10 kPa)
Sensor functional range:	-75... ~75 Pa
Supply voltage:	AC 24 V, 50/60 Hz, DC 24 V
Functional range:	AC 19...29 V / DC 19...29 V
Power consumption:	1.5 W (without actuator)
Dimensioning:	2 VA (with VST actuator)
Control function:	room pressure, stand-alone operation; positive control; parallel circuit
Setting range:	P _{min} = 0...100% of P _{nom} P _{min} to P _{max} (pressure) P _{kon.} = 0...100% of P _{nom}
Bus function:	BACnet MS/TP, Modbus RTU, MP bus
Command variable Y/Z: (inherent resistance min. 100 kΩ)	DC 0-10 V DC 2-10 V variable
Setting range: (actual value signal U)	DC 0-10 V DC 2-10 V variable
Sensor integration:	passive or active sensors (0-10V) for example, humidity, temperature 2-point signal (switching power 16 mA @ 24 V), for example switch, motion detector
Protection class:	III Safety extra-low voltage (SELV)
Degree of protection:	IP42 (measuring hoses and actuator connected)
Ambient temperature:	0 °C to +50 °C (environment), 5-95% relative humidity, non-condensing
Storage temperature:	-20 °C to +80 °C, 5-95% relative humidity, non-condensing
Operation and service:	via the ZTH EU setting device, Belimo Assistant app (NFC, Bluetooth) or via feedback signal/service plug with Belimo PC-Tool
Connection:	Terminals 2.5 mm ²
Dimensions:	170 x 98 x 58 mm
Weight:	approx. 340 g
Maintenance:	maintenance-free

Volumetric flow controller VRAPPS

Alternative electric controller

GUAC-SM3/SCH (make Gruner)

Digital VAV controller, with static pressure sensor, position-independent als communication-capable universal solution.

Measuring principle:	static differential pressure measurement
Measuring range sensor:	0...~300 Pa (bursting pressure 1 bar)
Supply voltage:	AC 24 V, 50/60 Hz, DC 24 V
Functional range:	AC 19...29 V / DC 19...29 V
Power consumption:	0.5 W (without actuator)
Dimensioning:	1.5 VA (without actuator)
Control function:	VAV/CAV; Supply/return air or stand-alone operation; master/slave or parallel circuit
Setting range V_{\min} to V_{\max} :	$V_{\min} = 0 \dots 100\% \text{ of } V_{\text{nom}}$ $V_{\max} = 0 \dots 100\% \text{ of } V_{\text{nom}}$ $V_{\text{konst.}} = 0 \dots 100\% \text{ of } V_{\text{nom}}$
Command variable Y/Z: (inherent resistance min. 100 kΩ)	DC 0-10 V (0-20 mA at least 500 Ω input resistance) DC 2-10 V (4-20 mA at least 500 Ω input resistance)
Setting range (actual value signal U/ PP):	DC 0-10 V DC 2-10 V
DCC controller:	DCC controller or PLC
Sensor integration:	passive or active sensors (0-10V) for example, humidity, temperature 2-point signal (switching power 16 mA @ 24 V), for example switch, motion de- tector
Protection class:	III (Safety extra low voltage)
Degree of protection:	IP54 (measuring hoses connected)
Measuring air and ambi- ent temp.:	0 °C to +70 °C (medium) 0 °C to +50 °C (environment), 5-95% relative humidity, non-condensing
Storage temperature:	-20 °C to +80 °C
Sound power level:	<35 dB(A)
Operation and service:	on the display, using a screwdriver directly at the device or via feedback signal/service plug using PC software
Connection:	cable 1000 mm, 4 x 0.75 mm ² (halogen-free), terminals
Dimensions:	124 x 71.5 x 66.5 mm
Weight:	approx. 175 g
Maintenance:	maintenance-free

Standard pneumatic controller

RLP100 F003 (make Sauter)

Pneumatic integral volumetric flow controller in connection with a damper drive with control flap and a measuring sensor for use with fixed, switchover and variable control

Measuring principle:	High-precision, static differential pressure sensor
Measuring range sensor:	1...160 Pa
Feed pressure:	1.3 bar +/- 0.1 bar
Air consumption:	44 l/h
Air flow pressure:	0.2...1.0 bar
Response sensitivity:	0.1 Pa
Allowed ambient tempera- ture:	0 °C to +55 °C
Degree of protection:	IP 30
Control direction:	Depressurised CLOSED/OPEN (B/A)

Conforms to EN 13463-1 and EN 1127-1 (Ex II 2 G T6) and for use in potentially explosive atmospheres of Zone 1.

For supply and return air (integral room air control system)

Alternative pneumatic controller

RLP100 F914 (make Sauter)

Pneumatic integral volumetric flow controller in connection with a damper drive with control flap and a measuring sensor for use with fixed, switchover and variable control. Can be used if air contains aggressive media.

Measuring principle:	High-precision, static differential pressure sensor
Measuring range sensor:	1...160 Pa
Feed pressure:	1.3 bar +/- 0.1 bar
Air consumption:	44 l/h
Air flow pressure:	0.2...1.0 bar
Response sensitivity:	0.1 Pa
Allowed ambient tempera- ture:	0 °C to +55 °C
Degree of protection:	IP 30
Control direction:	Depressurised OPEN (A)

Conforms to EN 13463-1 and EN 1127-1 (Ex II 2 G T6) and for use in potentially explosive atmospheres of Zone 1.

For return air with aggressive gases (integral room air control system)

Volumetric flow controller VRAPPs

Damper actuators ...24A-VST (make BELIMO)
for VRU-...-BAC

NM24A-VST

Actuator, communicative, with position feedback

Supply voltage:	AC 24 V, 50/60 Hz, DC 24 V, ready to plug in
Functional range:	AC 19.2-28.8 V / DC 21.6-28.8 V
Power consumption:	2 W (during operation)
Dimensioning:	4 VA
Torque:	10 Nm (at the rated voltage)
Running time for 90° (or 95°):	120 sec.
Activation:	communicative PP
Protection class:	III Safety extra-low voltage (SELV)
Degree of protection:	IP 54
Ambient temperature:	-30 °C to +50 °C, 5-95% relative humidity, non-condensing
Storage temperature:	-40 °C to +80 °C
Sound power level:	max. 35 dB(A)
Manual adjustment:	Gears are disengaged by pushbutton, self-restoring
Connection:	cable 500 mm with VST plug
Dimensions:	124 x 80 x 62 mm
Weight:	approx. 780 g
Maintenance:	maintenance-free

NF24A-VST

Spring return actuator with emergency control function, communicative, with position feedback.

Supply voltage:	AC 24 V, 50/60 Hz, DC 24 V, ready to plug in
Functional range:	AC 19.2-28.8 V / DC 21.6-28.8 V
Power consumption:	5 W (in motion)
Dimensioning:	8 VA
Torque:	10 Nm (at the rated voltage)
Spring torque:	10 Nm
Running time for 90°:	120 sec. (motor) < 20 sec. (spring)
Activation:	communicative PP
Protection class:	III Safety extra-low voltage (SELV)
Degree of protection:	IP54
Ambient temperature:	-30 °C to +50 °C, 5-95% relative humidity, non-condensing
Storage temperature:	-40 °C to +80 °C
Sound power level:	max. 40 dB(A) (motor)
Manual adjustment:	Manual winding with lock
Connection:	cable 500 mm with VST plug
Dimensions:	214 x 98 x 93 mm
Weight:	approx. 2300 g
Maintenance:	maintenance-free

NMQ24A-VST

High-speed actuator, communicative, with position feedback

Supply voltage:	AC 24 V, 50/60 Hz, DC 24 V, ready to plug in
Functional range:	AC 19.2-28.8 V / DC 21.6-28.8 V
Power consumption:	13 W (during operation)
Dimensioning:	23 VA
Torque:	8 Nm (at the rated voltage)
Running time for 90°:	4 sec.
Activation:	communicative PP
Protection class:	III Safety extra-low voltage (SELV)
Degree of protection:	IP 54
Ambient temperature:	-30 °C to +50 °C, 5-95% relative humidity, non-condensing
Storage temperature:	-40 °C to +80 °C
Sound power level:	max. 56 dB(A)
Manual adjustment:	Gears are disengaged by pushbutton, self-restoring
Connection:	cable 500 mm with VST plug
Dimensions:	139 x 88 x 77 mm
Weight:	approx. 780 g
Maintenance:	maintenance-free

NKQ24A-VST

High-speed actuator with emergency control function, communicative, with position feedback

Supply voltage:	AC 24 V, 50/60 Hz, DC 24 V, ready to plug in
Functional range:	AC 19.2-28.8 V / DC 21.6-28.8 V
Power consumption:	11 W (during operation)
Dimensioning:	22 VA
Torque:	6 Nm (at the rated voltage)
Running time for 90°:	4 sec. (motor) 4 sec. (emergency control)
Emergency position setting:	0...100% in 10% steps
Precharge time:	approx. 15 sec.
Activation:	communicative PP
Protection class:	III Safety extra-low voltage (SELV)
Degree of protection:	IP 54
Ambient temperature:	-30 °C to +50 °C, 5-95% relative humidity, non-condensing
Storage temperature:	-40 °C to +80 °C
Sound power level:	max. 60 dB(A)
Manual adjustment:	Gears are disengaged by pushbutton, self-restoring
Connection:	cable 500 mm with VST plug
Dimensions:	139 x 88 x 80 mm
Weight:	approx. 1400 g
Maintenance:	maintenance-free

Volumetric flow controller VRAPPs

Damper drives...24- (make Gruner)
for GUAC-SM3/SCH

361C-024-10-V

Spring return actuator, ready to be plugged in for GUAC...

Supply voltage:	AC 24 V, 50/60 Hz, DC 24 V
Functional range:	AC 19...29 V / DC 19...29 V
Power consumption:	5 W (in motion)
Dimensioning:	8 VA
Torque:	> 10 Nm (at the rated voltage)
Spring torque:	> 10 Nm
Running time for 90°:	< 150 sec. (motor) < 20 sec. (spring)
Activation:	6 ± 4 V DC (from GUAC)
Protection class:	III (safety extra low voltage)
Degree of protection:	IP 54
Ambient temperature:	-30 °C to +50 °C, 5-95% relative humidity, non-condensing
Storage temperature:	-30 °C to +80 °C
Sound power level:	< 35 dB(A) (Motor) < 65 dB(A) (Feder)
Manual adjustment:	Manual winding with lock
Connection:	Cable 1000mm with Phönix plug
Dimensions:	193 x 96 x 60 mm
Weight:	approx. 1,800 g
Maintenance:	maintenance-free

328CS-024-10B-V

High-speed drive, ready to be plugged in for GUAC... with position feedback

Supply voltage:	AC 24 V, 50/60 Hz, DC 24 V
Functional range:	AC 19...29 V / DC 19...29 V
Power consumption:	18 W (in motion)
Dimensioning:	22 VA
Torque:	> 10 Nm (at the rated voltage)
Running time for 90°:	3 sec.
Activation:	6 ± 4 V DC (from GUAC)
Protection class:	III (safety extra low voltage)
Degree of protection:	IP 54
Ambient temperature:	-30 °C to +50 °C, 5-95% relative humidity, non-condensing
Storage temperature:	-30 °C to +80 °C
Sound power level:	< 55 dB(A)
Manual adjustment:	Gears are disengaged by pushbutton, self-restoring
Connection:	Cable 1000mm with Phönix plug
Dimensions:	172.5 x 65 x 90 mm
Weight:	approx. 790 g
Maintenance:	maintenance-free

Volumetric flow controller VRAPPs

Controller selection

The selection of each actuator (torque) depends on the housing dimensions. The actuator is already selected and mounted at the factory.

Electric controller - standard				
Controller	Actuator	DM	AN	AG
- Gruner : - 327VM-24-10-DS4-MB	Compact	10 Nm	-	-A164

Electric controller - alternative				
Controller	Actuator	DM	AN	AG
- Belimo : - VRU-M1-BAC	NM24A-VST	10 Nm	-	-A151
	NMQ24A-VST	8 Nm	SL	-A154
	NKQ24A-VST	8 Nm	SR	-A155
	NF24A-VST	10 Nm	FR	-A156
- VRU-M1R-BAC	NMQ24A-VST	8 Nm	SL	-A159
- Sauter : - ASV215BF132E	Compact	10 Nm	-	-A138
	Compact	10 Nm	SL	-A139
- Gruner : - GUAC-SM3/SCH	361C-024-10-V	10 Nm	FR	-A069
	328CS-024-10B-V/ST06	10 Nm	SL	-A071
	341C-024-10-V	10 Nm	FR	-A073
	328CS-024-10B-V/ST06	10 Nm	SL	-A075
	327VM-024-10-DS6-MB	Compact	10 Nm	-

Pneumatic controller - standard				
Controller	servo cylinder	DM	AN	AG
- Sauter : - RLP100 F003	AK42P F003	200 N	LA	-A107

Pneumatic controller - alternative

- Sauter : - RLP100 F914	AK42P F003	200 N	LA	-A109
	AK42P F003	200 N	LA	-A111

Accessories:

S1A/S2A, limit switch make Belimo, to fit all new compact controllers and actuators of make Belimo.

ZTH EU, PC tool and ZTH EU for Belimo LMV-D3-MP / AST20 for Siemens GLB 181.1 E/3 / WIN-VAV-2 for Gruner 327VM.

DM = Torque

AN = Actuator type

SL (High-speed damper drive)

FR (Spring return)

LA (Linear drive)

- (standard)

AG = Attachment assembly

Attention

The volumetric flow controllers VRAPPs are used for air contaminated with aggressive components. For this reason, the Gruner controller 327VM-24-10-DS3 or the Belimo controllers VRU are mounted to the electric volumetric flow controller. In these controllers, the air volume throughput is measured using a static differential pressure measurement. A membrane integrated in the controller measures the pressure and prevents air flow to the measuring unit. This considerably reduces the risk of damage.

Due to the integrated membrane, the Belimo aneroid diaphragm must be installed in the correct position (non-horizontal mounting position)!

The Gruner controllers have a static differential pressure sensor which can be used irrespective of the position!

Legend

v_K (m/s)	= Duct velocity
Δp_t (Pa)	= Pressure loss
V (m^3/h)	= Volumetric flow
V [l/s]	= Volumetric flow
f_m (Hz)	= Octave centre frequency
L_W [dB/Okt]	= Sound power level / octave
L_{WA} [dB(A)]	= A-weighted sound power level
L (mm)	= Length
NW (mm)	= Nominal width

Volumetric flow controller VRAPPs

Order code

01	02	03	04	05	06	07	08
Type	Nominal width	Attachment assembly	Mode	Volumetric flow V_{\min} / V_{\max}	Volumetric flow V_{\max}	Duct connection	Damper position
Example

Sample

VRAPPs-110-A164-2-0100-0350-KA0-NA

Volumetric flow controller VRAPPs, round design (made of PPs) | NW 110 | 327VM-024-10-DS3-MB, compact | 0-10 V | $V_{\min}=100 \text{ m}^3/\text{h}$ | $V_{\max}=350 \text{ m}^3/\text{h}$ | without flange, butted | no spring return actuator

Order details

01 - Type

VRAPPs = Volumetric flow controller VRAPPs, round design (made of PPs)

05 - Volumetric flow set value V_{\min}/V_{\max}

0000 = ex-works, according to table
xxxx = Value in m^3/h (always with 4 digits)

02 - Nominal width

110	= NW 110
125	= NW 125
160	= NW 160
200	= NW 200
250	= NW 250
315	= NW 315
400	= NW 400

06 - Volumetric flow set value V_{\max}

0000 = ex-works, according to table
xxxx = Value in m^3/h (always with 4 digits)

07 - Duct connection

KA0 = without flange, butted (standard).
FF3 = with flat flange (pair), on both sides, PPs.

03 - Attachment assembly

- with electric controller – standard:

A164 = 327VM-024-10-DS4-MB, compact

08 - Damper position

NA = no spring return actuator (standard)
NO = currentless OPEN
NC = currentless CLOSED

Please note!

Counter flanges and duct silencers must be ordered separately!

- with electric controller – alternative:

A151 = VRU-M1-BAC, NM24A-VST

other modules available upon request (see Controller selection table on page 21).

- with pneumatic controller – standard:

A107 = RLP100 F003, AK42P F003 (linear drive)

- with pneumatic controller – alternative:

A109 = RLP100 F914, AK42P F003 (linear drive)

A111 = RLP100 F123, AK42P F003 (linear drive)

04 - Mode

0	= 0-10 V
2	= 2-10 V (pneumatic controllers can only be delivered in mode 2!)

Volumetric flow controller VRAPPs

Specification texts

Volumetric flow rate controllers for use in supply/return air systems for constant or variable volume flow, room or duct pressure control. Also suitable for use in digesters or with air containing aggressive media. With positive control V_{\min} , V_{\max} or "CLOSED". Permitted pressure difference range: 20-1000 Pa, permitted surrounding temperatures 0-55 °C. For use with duct velocities of 1-12 m/s (only Gruner 327 VM). It is possible to subsequently adjust the ex-factory set operational volumetric flows (type Gruner, setting directly at the controller via the potentiometer without service tool). The output signal can be used for master/slave or parallel operation of several controllers or for actual value display 2-10 V DC which corresponds to 0-100 % of the set V_{\max} or 0(2)-10 V which corresponds to 0-100% of V_{nenn} in DDC / ZLT systems.

Housing made of plastic PPs. Damper blade, damper axle and measuring cross made of plastic material PP. Controller and drive console made of plastic PP. Damper blade seal silicone-free made of PUR (NW 110 sealing airtight to DIN EN 1751 Class 2, NW 125 - 400 sealing airtight to DIN EN 1751 Class 3).

Housing tightness class C to DIN EN 1751.

Product: SCHAKO type **VRAPPs**

Nominal width:

- NW 110 (-110)
- NW 125 (-125)
- NW 160 (-160)
- NW 200 (-200)
- NW 250 (-250)
- NW 315 (-315)
- NW 400 (-400)

Attachment assembly:

- with electric controller – standard

- Gruner:
 - 327VM-24-10-DS4-MB, compact (-A164), 10 Nm

- with electric controller - alternative

- Belimo:
 - VRU-M1-BAC, NM24A-VST (-A151), 10 Nm
 - VRU-M1-BAC, NMQ24A-VST (-A154), 8 Nm
 - VRU-M1-BAC, NKQ24A-VST (-A155), 8 Nm
 - VRU-M1-BAC, NF24A-VST (-A156), 10 Nm
 - VRU-M1R-BAC, NMQ24A-VST (-A159) 8 Nm
- Sauter:
 - ASV215BF132E, compact (-A138), 10 Nm
 - ASV215BF152E, compact (-A139), 10 Nm
- Gruner:
 - GUAC-SM3/SCH, 361C-024-10-V (-A069), 10 Nm
 - GUAC-SM3/SCH, 328CS-024-10B-V/ST06 (-A071), 10 Nm
 - GUAC-PM3/SCH, 341C-024-10-V (-A073), 10 Nm
 - GUAC-PM3/SCH, 328CS-024-10B-V/ST06 (-A075), 10 Nm
 - 327VM-024-10-DS6-MB, compact (-A167), 10 Nm

- with pneumatic controller – standard

- Sauter:
 - RLP100 F003, AK42P F003 (linear drive) (-A107), 200 N

- with pneumatic controller - alternative

- Sauter:
 - RLP100 F914, AK42P F003 (linear drive) (-A109), 200 N
 - RLP100 F123, AK42P F003 (linear drive) (-A111), 200 N

Mode:

- 0-10 V (-0)
- 2-10 V (-2) (pneumatic controllers can only be delivered in mode 2!)

Volumetric flow set value V_{\min}/V_{\max} :

- ex-works, according to table (-0000)
- Value in m³/h (-XXXX) (always with 4 digits)

Volumetric flow set value V_{\max} :

- ex-works, according to table (-0000)
- Value in m³/h (-XXXX) (always with 4 digits)

Damper position:

- no spring return actuator (standard) (-NA)
- currentless OPEN (-NO), only for actuators with spring return
- currentless CLOSED (-NC), only for actuators with spring return

Please note!

Counter flanges and duct silencers must be ordered separately!

Accessories (at an extra charge):

- Flange (-KA0/-FF3) (duct connection)
 - without flange, butted (-KA0) (standard)
 - with flat flange (pair), on both sides, made of plastic material PPs (-FF3)
